JAMES FORBES

BIO

For the past 19 years I have worked professionally as a designer, creative director and manager for various companies during my career. I have a passion for beautiful and usable design. I also have an uncanny ability to cultivate teams and add to company culture. I enjoy working with people who like to have fun while elevating each other to do better work.

My right brain experience will provide you the creativity required to be a detail oriented designer, always learning new techniques and trends to increase quality/productivity and reduce cost.

My left brain business experience will ensure that I will recognize least cost solutions to design issues, that I am a team player and that I will do what it takes to complete projects on schedule. Most importantly, I can and will work to achieve the team goals. I bring real world experience, and I will be one of your best employees.

HOBBIES

In my spare time I enjoy collecting vintage (working) cameras and using them in various photo shoots. Aside from my passion for photography and video, I enjoy spending time with my wife and daughter, playing video games, reading, drinking craft beer and indulging my fascination with espionage.
